

## **Engineering • Information Technology • Program Management**

**B**ANC3 redefines the contemporary 8(a)/SDB: *Rather than direct our actions toward a limited range of target markets, we have built an operation that enables us to support the expanding needs of today's businesses growing in a technology-driven environment.*

From conception through services offered to continued growth, public and private entities alike utilize at least some aspects of engineering and IT to conduct business, meet regulatory requirements, stay competitive and satisfy the diverse demands of their intended markets. Recognizing that these specialized requirements could be better managed—and remain more cost effective—under a single roof, BANC3 expanded to respond to this challenge directly.

As a multidisciplinary Engineering and Information Technology consultant, BANC3 provides a fusion of essential civil and environmental engineering services with expertise in the cutting-edge programming, hardware and software that powers a contemporary world. Through this unique focus, we can anticipate the needs of our clients and design technical solutions on demand. By also integrating Program Management into our base, we solidified our capacity not just to execute projects, but to lead our clients through complex ideas and decisions.

From our corporate headquarters in Cranbury, NJ, BANC3 implements our custom in-house services on projects across the country. With over 70 project managers, task leaders, professional engineers, surveyors, technicians software developers, network managers who are experts in their respective fields, we are able to insert singular design, planning and construction support immediately into a project. By making a personal investment in every project, we take on clients' needs as our own to ensure that the best technical plan,

expert resources and seasoned leadership will culminate in the project's ultimate success.

The fact that BANC3 does succeed on these projects demonstrates that our engineering services and experience deliver the results our clients demand. BANC3 is recognized by such clients as the United States Army Corps of Engineers and Lockheed Martin for providing exemplary critical and specialized services—and designing effective solutions—to support and improve operations, growth and regulatory compliance for private industries and all levels of government.

Through professional services that encompass your business' most critical needs, BANC3 stands ready to serve as your **consultant of choice**.

**Recognizing the need to design technical solutions on demand, and anticipating the needs of our clients, BANC3 provides "one-stop" engineering services.**
